

PRODUCTION ASSEMBLER

UNMATCHED PRODUCTION

The Production Assembler features heavy-duty configurations designed to meet the requirements and challenges of the high-volume, industrial producer. The Model 283 assembles one, two, and four dozen cell partitions quickly and efficiently. It's max partition assembly size is 24" x 24" x 14". It's precision, speed, and efficiency are unmatched in the industry.

HIGHLY VERSATILE

The automatic partition assembler machine assembles pre-slotted fiber and all types of corrugated partition strips from e-flute to double wall. Primarily used in high-volume production applications for one, two, and four dozen cell partitions for beer and wine bottles and other glassware. Add an optional collapser/ stacker machine and reduce your labor.
