

# FIBER STRIPPER

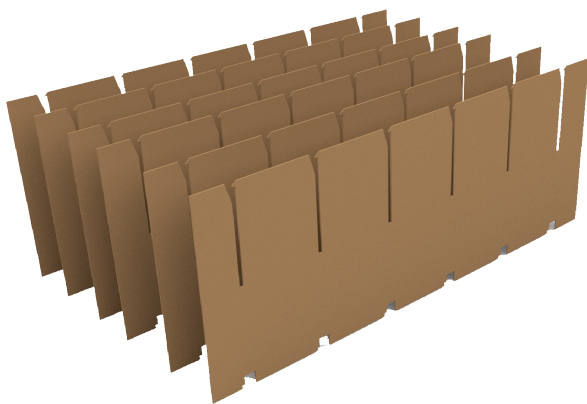

## FIBER STRIPPING

Our fiber stripping machinery is available to produce clean punch configuration slots and “V” slots simultaneously for ease and speed of assembly. Machinery is available in several width and height capacities to solve your most difficult production needs. This machine also features rapid tool change-over, utilizing top and bottom die set up plates and a shaftless roll rack. This allows for several width capacities, up to 36 inch (91cm), enabling multiple output production requirements for numerous applications.
