

# DARB Transfer Device

C&M Conveyor's Dual Activated Roller Belt (DARB) System is a must for dual load forming operations and diverting non-conforming product, allowing you to achieve transfer rates in excess of 20 bundles per minute where an overall compact footprint is desirable.

The versatile inline transfer device utilizes the Intralox Activated Roller Belt™ technology to provide right-angle (90 degree) transfer of bundles of corrugated material or to allow bundles to continue downstream. Lateral product movement is achieved by engaging the belt rollers to transfer product to one side while the belt continues to run forward.

Belting contains two rollers mounted one on top of the other to provide either left or right diversion. Transfer rate is 1:1 with the in-line conveyor speed.

*C&M is the exclusive licensee for Intralox Activated Roller Belt for North and South America for the corrugated and folding carton market. Units shown incorporate licensed technology which is patented.*

*Leading supplier to  
the corrugated box industry*

## C&M CONVEYOR

## DARB Transfer Device

## Features and Benefits

Allows two direction bundle diversion without stopping

- Increases product throughput.
- Loads can be sent straight through or diverted 90° enhancing the flexibility of order processing.

Variable Speed Discharge

- Throughput may be tailored, as required, based on bundle type.

Processes tied and untied bundles

- Offers greater flexibility in bundle type that can be processed by the unit.

Low Maintenance

- Maintenance-free grease-packed drivetrain.

Safety

- Guarding on all moving parts, radius corners reduce sharp edge injury risk, belt has closed surface with fully flush edge.

Adjustable Height

- Top of belt height is adjustable from 32-in. to 34-in.

## Specifications

Width	54 Inches
Length	68 Inches
Top of Belt Height	33 Inches*
Conveyor Speed	50-200 FPM**
Control Voltage	120v AC, 24v DC
Gearmotor Rating	2 HP
Voltage	190/380V, 230/460V, 575V
Load Rating	400 lb max load

\* Custom options available on request

\*\* Based upon application; bundles must be tied to utilize higher rates)
