Productivity Optimization Display

- O **Measure** machine production
- O **Visualize** key performance metrics
- O Data log 24/7 operation
- O Communicate plant floor, plant wide, worldwide!

Productivity Optimization Display

ProDisplayInfo.com

PRO Display

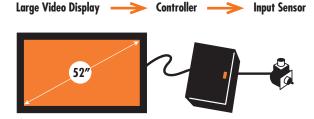

View machine status on the factory floor, desktop PC, or your phone. Have an iPhone? We have an "App for that!"

- The key to improved productivity is **visibility of performance**. The ProDisplayTM is a productivity improvement tool for the factory floor displaying key metrics of speed, quantity and downtime. Actual vs. Target performance is continuously displayed in real-time to operators and management. The ProDisplayTM is a unique bundled-technology solution that is guaranteed to improve the productivity of your manufacturing process.
- The ProDisplay™ uses the latest in video and web-server technology to communicate information via multi-mode video including large screen display; desktop PC and smart phone. Production data is **logged 24/7 for analysis**.
- Customized to your specific information needs, the system is offered as a stand-alone solution with machine sensor; or connected to your existing PLC or manufacturing software. The ProDisplay™ is a true "plug and play" product; there is no software to install, no configuration programming; no dip-switch settings.
- O Delivers real-time actionable data of production and machine status.
- O Increases productivity and motivates operators by displaying key machine metrics and goals.
- O Instantaneous data is delivered to your desktop computer or the "palm of your hand."
- O Incorporates big screen LCD video displays for vibrant color visualization.
- O Huge 18" character display is visible from hundreds of feet away.
- O No software to buy, install, support or maintain.
- O Upward compatible to plant HMIs, SCADA systems and SAP.
- O Proven system with installations worldwide.

Video advantage

- Single or dual display options
- Large display characters (18") viewable from hundreds of feet
- Dynamic color backgrounds indicating process condition
- Variety of data displayed via multi-screen sequence
- Custom message displays controlled by user
- Big, bold and modern scoreboard for your factory floor

Communication

- Ability to interface to all industry standard PLCs
- Desktop PC display via browser
- Self-contained, data stays in-house
- Cellular phone interface including iPhone App
- Automatic text and e-mail messaging
- Upward compatibility to HMI, SCADA and SAP
- Optional cellular module for "IT free" interface

Data logging/Historian

- Real-time 24/7 data reporting log
- Stores data up to one year minimum
- Compatible with all Microsoft Office tools
- Automatic creation of daily CSV log files
- Shift summary e-mail report
- Downtime alert via text/e-mail

Specifications

- Communication protocols: Ethernet; RS-232; RS-485
- Available 8-digital inputs for user interface to system
- Available 6-digital outputs for external control
- High-speed input sensor (Encoder, Photoeye, or Proximity)
- Control enclosure: 16" x 16" x 8" NEMA rated
- Power requirements: 120/240 VAC, single phase, 60 Hz, 5 AMP
- Video displays: Color LCD, 42" and 52" options
- UL listed; Made in the USA

Complete solution

- Includes video display, mounting hardware, controller, and sensor
- Independent interface; no modification to your machine required
- System pre-configured to your specification; no programming
- Update system changes by electronic file or CF module
- Sound investment; scalable and adaptable
- No software to install, no management fees
- Simple integration; delivered in complete kit form
