

# *Scoring Rings*

**ZENITH CUTTER CO.®**

# "The Zenith Advantage"

## A Single Collar Accepts Any of Our Standard Profiles...

All ZENITH Collars and Rings Made from Steel Forgings

- For Corrugators, Slitters, Printer Slotters and Folder Gluers
- Durability is assured by using fully hardened steel rings.

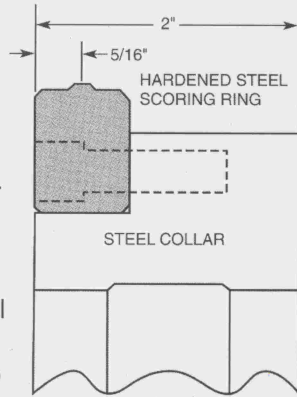

These will withstand the abuse of dropping, running together and misalignment as no other material can.

- Rings are mounted on steel collars for longest life and superior strength. Standard width is 2" for close set-ups. These also can be supplied in 1-3/4" and 1-1/2" widths.

- Concentricity is maintained by grinding the profile on each ring after heat treating.

- Profiles shown are standard. Special profiles quoted on request.

- Your old scorers can be reworked to accept the rings if they are in reasonable condition.

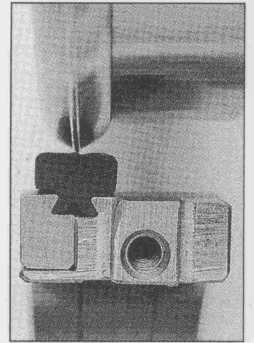

Drawing shows how scoring ring is adapted to collar for quick, accurate set-up.

## Zenith Profiles for Flexos and Printer Slotters in Conjunction with Zenith Polyurethane Inserts

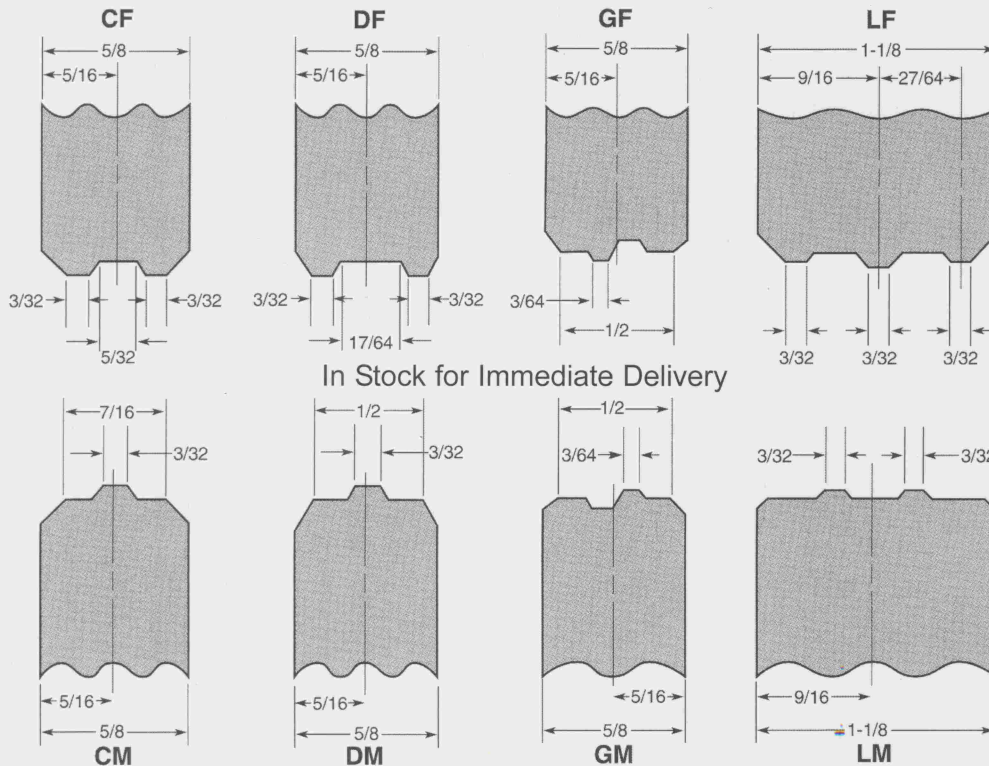

- Improve quality with Zenith Scorers. New advances in press scoring eliminate score roll and result in better box integrity.

- Zenith Polyurethane Inserts are a perfect match-mate for scorers, and have been developed for rugged service. We furnish it in any length for easy cutting-to-size, thus eliminating the need to carry pre-cut spares for varying O.D. heads.

- The Locking System of the Zenith head and dovetail shape of the underside of the insert provide a firm grip and positive locking of the insert.
