

Baysek HF101

Handfed Reciprocating Flat Bed Die Cutter
50" Through, 50" Across

The Baysek Principle

- Single operator production
- Nick free, dust free die cutting
- Rapid changeover – typically less than 30 minutes
- Multiple materials with little to no adjustment
- Cut multiple parts on the same die

Baysek HF101 Operation

- Single sheet operation
- Automatic outfeed on sheet count
- Excellent tolerance for warped sheet
- Ideal for reusing scrap cutoff material

Specifications

- 500+ sheets per hour
- 50" through x 50" across
- Electrical Requirement: 460VAC, 3 phase 30 amps
- Compressed Air Requirement: 100PSI @ 30CFM

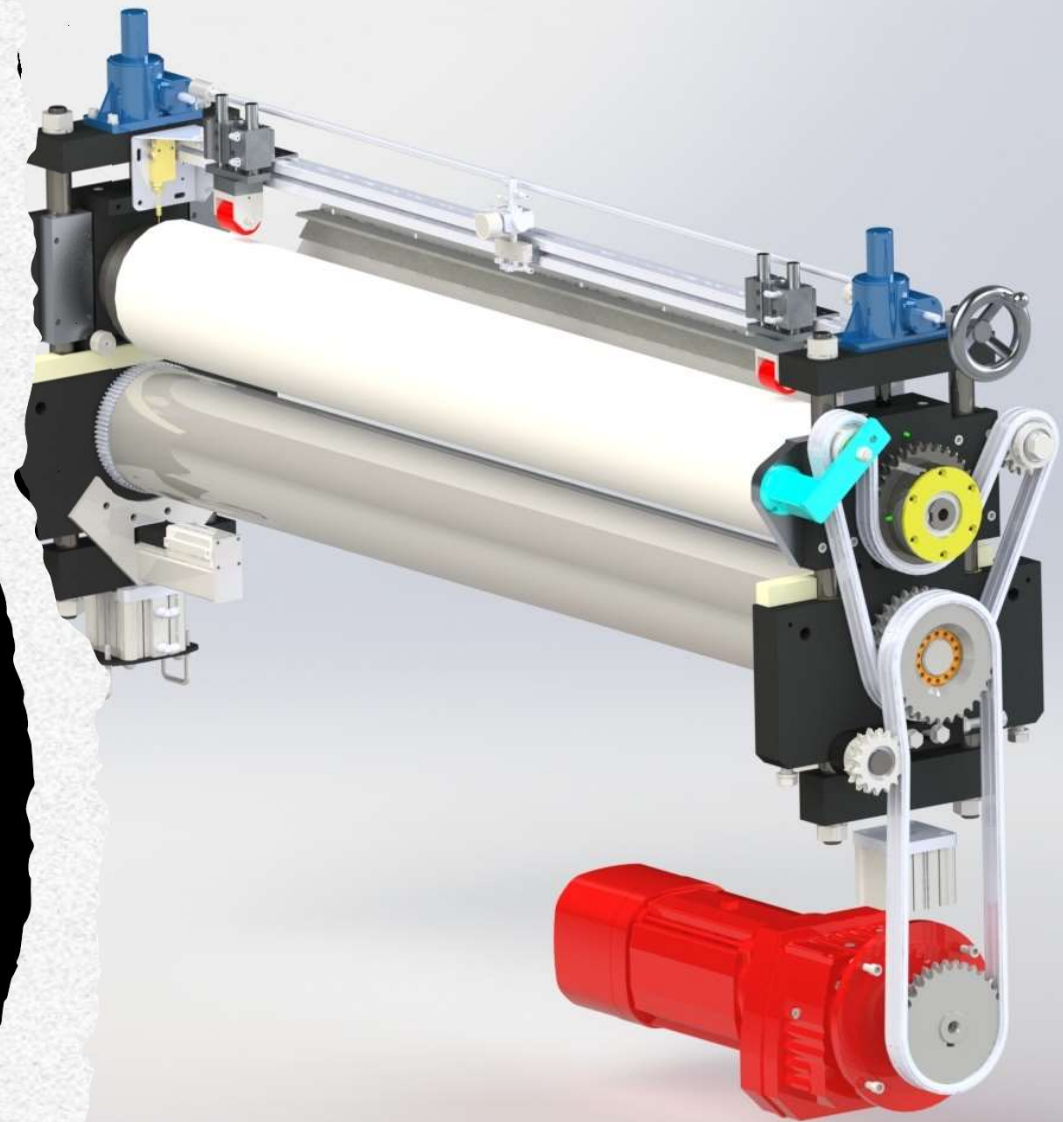

External waste system required

Suggested 8500 CFM

Setup & Maintenance

- Designed for ease of installation
- No special foundation requirements
- Built for minimal maintenance with basic hand tools

Safety By Design

- Designed from the start for CE compliance
- Interlocking magnetic switches on all windows & doors
- Interlocked access panels for ease of service
- Mesh guarding for fixed openings
